

WOS Forms Partnership With Aktion Associates

Old News... You are aware that Intuit sold Master Builder to a larger construction industry software provider, Sage Software.

New News... You should also be aware that Sage Software believes that you, the customer, should have a choice. Intuit's last business model allowed for only one dealer in a market for sales and customer management. Sage, on the other hand, allows for more than one dealer in a territory.

At this time Wright Office Solutions (WOS) has chosen to align with the Sage Business Partner, Aktion Associates. WOS has had successful customer support interaction with the management of Aktion Associates and we are stating our confidence that customers of WOS can trust the competence and integrity of Aktion. Watch for announcements for an informational meeting in your area coming later this summer. What all this means to you might best be conveyed with a telephone call at your convenience. As always, we would like to answer your questions when you have a minute to call. **(734) 591 9313**

More about Aktion...

"Aktion has made a significant investment in understanding the IT needs of the construction industry. Over the last 10 years Aktion has received numerous awards from Sage recognizing their excellence in sales and service. They are a member of Sage's 2005 President Circle and prestigious 2005 Chairman's Club. Aktion is honored to be among the handful of Sage Timberline Business partners to be authorized to represent the Sage Master Builder product. Currently more than 1,400 builders and contractors rely on their highly skilled technical experts to provide a total IT solution. Sage Master Builder customers will benefit from the joining of our two entities in a higher level of service."

New Fax Number

Our **NEW** fax # is **(734) 367- 4896**. Please write this number down for future reference.

Our next issue will highlight a Master Builder customer!

WOS Tech Tip

Anti-Virus Alert on Master Builder File

It has been reported that the file **DWSHK36.ocx** installed by Master Builder is triggering some new anti-virus software to think the file is spy ware or a virus file. This file is actually an Active X Control by Desaware, Inc. that is used by Master Builder in the e-mailing of scheduled reports.

Set anti-virus software so as **not to delete** this file.
